Motivation Letter LYMEC Internal Auditor – Fabian Grepper

My name is Fabian Grepper, a 27-year-old history student and young professional from Switzerland. My main interests lie in infrastructure policy, environmental politics, as well as inclusion and disability rights. In the past, I have had the opportunity to work extensively within LYMEC. In parallel, I have developed a strong focus on governance, financial oversight, and accountability in the public sector. Through my experience as a member of the finance committee of my home municipality and associated district/county-owned entities.

I also have a strong interest in foreign policy, which closely aligns with my passion for discovering new cultures and travel. Beyond my professional and political engagement, I have a deep appreciation for art and classical music, and I regularly attend museums, exhibitions, and concerts whenever possible.

Dear Delegates,

For many years, I have been actively involved in the International Team of the Jungfreisinnige, advocating for youth interests within both LYMEC and IFLRY. After many years of dedicated engagement, I retired from my operational role in 2025. However, my commitment to LYMEC and to strengthening our organisation remains strong, among others as part of the IMS. I am therefore highly motivated to continue contributing in a new capacity - as Internal Auditor.

What distinguishes my candidacy is not only my long-standing political involvement, but my solid experience in financial oversight and auditing. As a member of the finance committee of my home municipality, as well as of associated district/county-owned entities, I am directly involved in reviewing budgets, financial statements, and ensuring compliance with public governance standards. This role has provided me with practical, hands-on experience in supervising public finances and assessing accountability structures.

In addition, I bring the necessary technical expertise for this position. During my university studies, I completed coursework in accounting and successfully passed the corresponding examination. Furthermore, I am a verified and certified internal auditor for public entities and accounts through the “ipm – Institut für Public Management”, a governmental institute for public management. These qualifications enable me to approach auditing tasks with professional rigor and a strong understanding of public-sector-specific requirements.

Equally important, I have the required time capacity to fully dedicate myself to this role and to carry out the responsibilities of an Internal Auditor reliably and thoroughly.

Through my years within LYMEC, including my participation in policy renewal working groups, I have gained a deep understanding of the organisation's structures, policies, and internal processes. This institutional knowledge allows me to assess not only financial matters but also organisational procedures in a well-informed and constructive manner.

I see the role of Internal Auditor as essential to ensuring transparency, accountability, and trust within LYMEC. My approach is pragmatic, detail-oriented, and independent. I am committed to carrying out this function with integrity, objectivity, and a clear focus on strengthening the organisation as a whole.

It would be a great honour to serve LYMEC in this capacity. I am ready to contribute my expertise, my experience, and my dedication to ensure sound financial oversight and to support the continued development of our organisation.

Sincerely,
Fabian Grepper
