

„We want a country, where everyone has the same rights, where everyone has the same opportunities and everyone is treated justly, no matter their gender, sexual orientation or where they were born. We believe in a Progressive Slovakia.“

VALUES OF THE YOUTH PROGRESSIVES

1. We believe in liberal democracy

We believe in a society, where every person will have the opportunity to decide the path of their life, based on their own values, unless it limits the freedom of others. Democracy is a necessity for young generation.

2. A socially just country

A country, in which everyone has the same rights and opportunities. We want a Slovakia built on working together, rather than fighting, where every part of the society can partake. We believe in a society built on solidarity of the strong and the weak, of the rich and the poor, the young and the old, the ill and the healthy. We want a country, in which the basic means of a decent and happy life are secured.

3. Accesible education

It is the task of modern society to ensure accesible education for every young person, which will in turn ensure, that everyone can become indepentent when they become an adult. Which will raise a young person, who'll be able to view the world with their own eyes, critically and freely.

4. We are Slovaks, but Europeans too

It's right to be a proud Slovak, loving their country, but much more daring is to be a proud European, fighting for all Europeans. We are for a transparent, democratic, tolerant, solidary and responsible European union, which will ensure a more stable, responsible and just society.

5. Green future

An environmental and sustainable society, which values and protects the public space and environment, respects the rights of all living beings and is not oriented towards overconsumption and property.

6. A free society

Freedom means respecting the rights of every individual to act, decide and live, as they wish. Freedom in a modern society means respecting differences and accepting, that everyone is different and this difference is the key for society to live, prosper and progress.

7. Progressivism

The old political division between the left and the right is a thing of the past. Progressivism wants to move the country forward. We are convinced that even a christian or a liberal, a reasonable rightist or a socialist. Progress is a symbol of a change for better. We, the young, support the values and the program of the political movement Progresívne Slovensko.

8. The millenium generation

We are a young generation, which partakes in the civil society issues, fights for its rights and is not afraid to speak up against injustice. We are a generation, that's not afraid of challenges, own failures and wiles. We are a generation that wants to work actively, gain experience and better ourselves. We are the generation that will change Slovakia.
