

*Liberal-Democratic Party*

Dear LYMEC Bureau, in view of our accumulated debt and difficult financial situation we would like to ask you for a reduced membership fee of **100 EUR effective** until we stabilize the situation in our organisation. Regarding all of our issues with finances, we would like to suggest an offer to pay a small amount of our debt with a total of 200 EUR. We would also like to suggest a reduced membership fee of 5 EUR until we can stabilize our organisation. In order for you to analyze the situation and give your recommendation on the way further please find the following relevant information on our status below:

Organisation of the LDP youth forum is located at the central offices in Belgrade that we share with the rest of the party members. Currently the youth forum has active members all over Serbia, but there are only 3 to 5 people that permanently work at the offices, depending on their availability and time. All of the finances that our party receives from state funds mostly go to debts that we have accumulated over the past years, therefore a small amount actually reaches the LDP youth forum. As for the paying members of our youth forum we do not require any payments from our members because that would majorly effect mood and activity among our youth. Due to financial issues our international activity with LYMEC and other organisations has been more passive than active and therefore that has greatly affected our availability to participate in LYMEC events and other activities. Due to accumulated debts we are mostly unable to pay all of them therefore the money that we do have usually goes to pays, activities, campaigns and so on. The banking system in Serbia is acceptable and stable, so we very rarely encounter any obstacles regarding finance.

Our cooperation with LYMEC has proved to be one of our most important assets regarding activities with the youth. The opportunity to network with other organisations through LYMEC is a valuable resource, especially in situations that require all the support we can get. These events also provide our members with necessary education for their future work in youth politics and politics in general. With that in mind, LYMEC is a big influence on our youth members and it has an important role in shaping our members towards being more active, educated and motivated to pursue activism in the future. In the company of LYMEC our youth has greatly evolved and it is of great significance that we have a chance to even provide our members with experiences and events that LYMEC organises every year.

We hope that we can maintain good relations that the youth of LDP has with LYMEC and we want to show full initiative towards handling the obstacles that have been set before our organisation due to financial issues of our party,

Kind regards,

Members of the LDP Presidency,

---

Mijat Kontić
