

Motivation letter

Dear delegates

By way of this letter, I would hereby like to candidate myself as a substitute internal auditor. You may know me as LYMEC's former administrative assistant and current IMS delegate. Since I have been engaged so closely with our organization, it's easier to orient myself in the auditing process if it would be necessary.

Since the age of sixteen I have been politically engaged in Jong VLD. There I have learned how to structure the organisation and keep our financial status healthy. Later on when I became president of the Liberal Flemish Student Association Antwerp I finetuned my skills. The budgets were larger, there was a rough period in the past, but we managed to turn the tables. I left the organisation profitable, while organising the biggest student debates in Belgium once a year and other smaller activities every week.

I do have some minor auditing experience and I believe being the substitute internal auditor can help me to grow in this field, while being a good fallback option.

As administrative assistant of LYMEC, I have been working on the congress in Brussels and other events in cooperation with LYMEC's partners. I've witnessed how the finances and even audits worked, read internal audit reports, making I have a realistic view on the internal processes. This is an advantage that I got during the period I worked at the office. And I believe it's now time to give something back after getting so much during the internship. I'm ready when I'll be needed.

Thank you and I count on your support.

Best wishes

Laurenz Van Ginneken
